Work Experience

2016.11 SSENSE — Montréal, Canada

Sr. Data Scientist

[Product Similarity] In order to finding out-of-stock products alternative, searching based on product description and product image by applying topic modelling, deep learning and transfer learning techniques (WORD2VEC, VGG/AlexNet/...).

[Recommendation System] Design & build a product recommendation system with Spark, libFM, Scikit-Learn, implicit by applying advanced academic research of Collaborative Filtering (Matrix Decomposition, Similarity Measurement, Frequent Pattern Mining). Tackle the SKU rotation by apply word2vec on product description.

[Sizing] Modeling size ratio by applying statistical modeling, and providing revamped interactive tool via R-Shiny App

[Brand Clustering] Based on customers' purchase and browsing, using graph community detection to identify the clustering of brands per Men/Women.

[Pricing] Markdown for sales, build price elasticity modeling

2015.9 Group OnePoint — Montréal, Canada

Sr. Data Scientist

[Big Data] Contributing to the transformation of the legacy system to Hadoop Architecture by developing Hive, Spark, ElasticSearch application for RATP

[Text Matching Algorithm] Helping GE France to match their products name from different sources by applying fuzzy-match and matrix calculation

[Real-time Analysis] Providing real-time insight of CitiBike trip data by setting up a real-time Zeppelin dashboard which accesses the NiFi's data flow via Spark Streaming

[Real Estate] Providing insightful information regarding the real estate sales market in Montréal island by scrapping from Centris and consolidating, visualizing the data

[Team building] Helping Senior Manager to build a new Data Scientist Team inside the Group

2013.9 EY France Advanced Analytics — Paris, France

Data Scientist

[Sales Territory Optimization] Helping Richter Gedeon to reorganize the sales' representatives in France by optimizing the territory alignment

[Conception] Crunching the operational data of CitiBike and modeling to help financial prevision, maintenance prediction

[HR Analytics] Applying survival analysis in retirement prediction & churn which offers the ability to prediction and diagnose

[Statistical Modeling] Improving the precision of EDF's call center predicting through diagnosing the statistical model and providing KPI monitoring by developing a web application

[Text Mining] Providing product insight to R&D and marketing team of L'Oréal France by scrapping web content from an e-commerce leader and apply text mining / topic modeling on the clients' reviews

Education

2012.12 Master of Business Analytics (TIDE) — Paris, France

University of Paris I - Panthéon Sorbonne

This postgraduate program trains students in the techniques of data processing, statistical analysis and economic forecasting, coupled with a theoretical and practical knowledge in current economic policies, strategies implemented.

2012.12 Magistère of Economics — Paris, France

University of Paris I - Panthéon Sorbonne

The Magistère of Economics is a selective program from the University of Paris 1 La Sorbonne in cooperation with ENS Paris and EHESS. It includes a Bachelor in Econometrics and a Master's degree in Economics in partnership with the Paris School of Economics.

Language

Chinese	Native
French	Fluent
English	Fluent

Skills

- Machine Learning
- Statistical Modeling
- Data Visualization
- Data Crunching

Programming

- R
- Python
- Spark (PySpark, Scala)
- SAS
- SPSS

Honors

Kaggle - BNP Paribas Cardif
Claims Management
Rank 47 Top 10%

Global Management Challenge
2011-2012
France 1st Prize Final

Certification

IBM Certified Specialist
SPSS Statistics | Modeler

SAS certified
Advanced Programmer

MapR Certified
Spark Developer
